Good evening Brent,

On April 15, 2019, ITC requested that TCEQ give it “permission and authorization” to begin transferring products via pipeline to and from its Pipeline Connected Customers. The TCEQ was not involved in any decisions relating to ITC pipeline operations unaffected by the 2nd 80’s Tank Farm Fire and has not directed ITC to stop transferring products for its customers. To the extent that pipeline transfers in areas of the terminal not affected by the fire can be accomplished safely and without adversely affecting public health, safety, the environment, or ongoing incident response efforts, the TCEQ has no objection to ITC resuming pipeline transfers for its Pipeline Connected Customers.

Subject: Pipeline Transfers - Authorization Discussion

To all,

We have been discussing among ourselves if ITC could have permission and authorization to begin limited terminal activities.

Specifically, ITC has had multiple requests from our Pipeline Connected Customers to begin making pipeline transfers. Some transfers would be to our customers and some would from our customers.

These transfers would be in areas of the terminal that are not in the Impacted Tank Farm.

We would obviously do minimal transfers based on the need and the priority, but wanted to begin these discussions in advance to get everyone thinking ahead. Thanks.

Please comment as needed.
